RMCG/KRE

23rd May 2024

Dear Parent/Carer

I am writing to you as we prepare for the end of year assessments for all students in Years 7 to 10. As you will be aware, our Year 11s are in the full flow of their GCSE exams and working hard to ensure their best chances of success and now the attention turns to those in preparatory year groups.

The exam timetables have been added at the end of this letter and show when core subjects will be examined. These assessments will take place in lesson time during the examination period, which runs from 10th June – 20th June. For our students in year 10 several exams have been timetabled into the exam hall to provide full GCSE experience in preparation for next year.

All assessments will be conducted under exam conditions, meaning that watches may not be worn, and mobile phones must not be present in the exam, either of these will lead to a disqualification and we ask that you support your child in meeting these expectations and consider leaving phones at home in this period.

Exams form a significant and influential part of a student's development journey, and the outcomes will help pave the way to a successful future. In order to support your child in achieving their best please do consider the content of this letter and make use of some of the information and support provided.

Should you have any enquiries about the examinations, please do make contact with your child's tutor in the first instance.

Yours sincerely

Matt Forrest

How much revision should my child do?

It is commonly considered that a **little, often** approach is the best, while some children prefer to do extended sessions. Putting a little time aside each day and planning which subject to tackle is the best approach to ensure even coverage and preparation.

How can I support Revision?

While we would like all students to be self-motivated, we all know how challenging the process of revision can be, not least when there are other distractions at hand.

Having a simple calendar that is shared between you helps to keep things on track and makes it easier to mark out a time when other devices and distractions are off to get the most out of a revision session.

Sometimes tricky concepts need revisiting and working through problems together using the online resources or knowledge organisers can be a huge support. Solving these challenges and learning together helps to teach children additional skills in resilience and initiative that will become lifelong assets.

Where can I find Revision Materials and extra support?

Every student at Morton is provided with Knowledge Organisers which contain the core knowledge for all subjects. These are an excellent starting point for revision and preparation for the tests.

Many subjects are also making use of online resource using Teams, Seneca and Satchel One etc to give students the best chance of success. These can all be accessed using your child's school login:

www.corbettmaths.com
